

## Mixer Controls

- **Gain** - sets preamp level - one for each mic
  - Avoids clipping - very important
  - In some mixers the signal goes directly to the A-D converter and out the USB port from here
- **Aux** - sends a copy of the signal to an external device such as a reverb or to stage monitor speakers.
- **EQ** - adjusts the bass - middle - treble for this mic.
- **Pan** - adjust placement of sound in stereo pattern
- **Faders** - adjusts volume of this mic in main speakers (“mains”) or headphones
- **Master Fader** - adjusts volume of the combined mics
